Mr Nate Campbell  
Video Alarm Technologies Pty Ltd

Dear Nate,

I wish to take this opportunity to let you know how happy we are with the Videofied Product. As you know we have only recently started using the Videofied system. Since we have been using the Videofied system we have been extremely happy with the product.

Our best experience was a situation where one of our customers had begun storing stock on site at their new store **prior** to us installing their security system. Unfortunately the store was broken into and some stock was stolen, as a short term measure we installed a temporary Videofied system to protect the store until the full security system was installed.

The client armed the system at 10.08 pm on the first night after we had installed it and by 1.06 am the next morning an intruder had been detected, police attended site and arrested this intruder on site! Yes less than three hours after the system was armed it had assisted the police with an arrest.

The client was amazed by this and needless to say totally impressed with the system.

The owner of the building became aware of the success and was so impressed he purchased multiple systems that same day.

We now have many customers using the product.

Regards,

Hayden Stafford (Dip SRM)  
Director
