

UNIQUE SECURITY GROUP

CAUGHT - Unique Security Group installs Videofied in vehicle wrecking yard....only a few days later, three intruders onsite are arrested when police respond with wave of force.

Unique Security Group had a cry for help from a client who had no answers to stopping the theft of between \$3000 and \$6000 worth of parts from his wrecking yard each weekend. What was even more frustrating to him was that he already had a CCTV System in place!

The owner would spend days at a time viewing footage in an effort to identify offenders. Their arrogance was such that they (the intruders) would wave to surveillance cameras around the site. To add more cameras and lighting to the 3.2h site was far too expensive and this did not appear to be a deterrent anyway.

A Videofied system was installed in under an hour and within 3 days of installation they had an alarm activation with video verification....unlawful persons on premises. Police were called and the response was overwhelming; 2 teams of Detectives; 1 Highway Patrol; and 3 General Duties teams attended to the call. And to think the client was initially worried about whether the Police would actually attend at all. Police in this case arrested three intruders onsite in the act of attempting stealing equipment.

Needless to say the client was very pleased that night and will provide a glowing reference to anybody who asks. Remembering the system was in place for only 3 days.
